

شركة كويت تكنولوجيكال سيرفيس  
KUWAIT TECHNICAL SERVICE CO. W.L.L.

# Business Company Profile

*Planning & Designing,  
Interior Design, Landscaping,  
All kind of Engineering & Contracting work*

**KUWAIT TECHNICAL SERVICE CO. W.L.L.**

**Munira Complex , Floor # 05 , Office# 14, Fahaheel , Near NBK , Kuwait**

[www.kuwaittechservices.com](http://www.kuwaittechservices.com)

# About Company

*Kuwait Technical Service Co. W.L.L., presumably a construction and technical services company based in Kuwait, is likely involved in the planning, design, and execution of various construction projects. This could include residential, commercial, or infrastructure developments. The company might specialise in providing a range of technical services such as architectural design, engineering solutions, project management, and construction supervision.*

*The construction and design processes typically involve collaboration between architects, engineers, and construction professionals to ensure that projects meet quality standards, adhere to safety regulations, and are completed within specified timelines and budgets. Kuwait Technical Service Co. W.L.L., may also be engaged in offering maintenance and post-construction services to ensure the longevity and functionality of the built structures.*

## ■ Mission

*The mission of Kuwait Technical Service Co. W.L.L., revolves around providing quality products and services that are accessible to a wide range of customers. The company aims to bridge the gap between affordability and excellence, making it a preferred choice for clients seeking reliable solutions in the construction and design sector.*

## ■ Vision

*The vision of the company is outlined with a clear commitment to unparalleled excellence in quality. Kuwait Technical Service Co. W.L.L., envisions itself as the first and best choice for esteemed customers, emphasising continuous improvement in products, processes, and service standards. The company aspires to achieve the highest levels of customer satisfaction, emphasising not only quality and performance but also safety in all its endeavours.*

# OUR SPECIALIZED SERVICES

*Planing*

*Interior Designing*

*structural design*

*Landscaping*

*Flooring - Tile, Granet,etc*

*Electrical*

*Solar System Installation*

*Plumbing*

*Painting*

*Welding works*

*HVAC*

*All kind of contracting works*

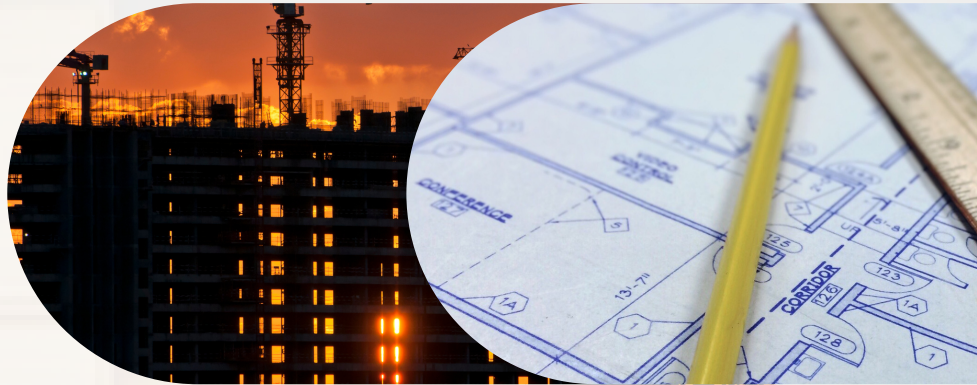

*All kind of Engineering works*

## Design & Execution Planing

Residencial, commercial - shops

*Building design planning involves meticulous consideration of spatial functionality, aesthetic elements, and structural integrity, ensuring a harmonious blend of form and function. Through thoughtful collaboration between architects, engineers, and stakeholders, a well-conceived design plan lays the foundation for successful construction projects that meet both practical needs and aesthetic aspirations.*

## Design & Execution Interior

All kind of interior works  
Residencial, commercial - shops

*Interior designing is the art of creating aesthetically pleasing and functional indoor spaces by harmonizing elements such as color, furniture, lighting, and textures. Interior designers leverage their expertise to enhance the overall atmosphere, optimize spatial layouts, and reflect the client's style and preferences within the confines of a space.*

## **Design & Execution structural**

**Residencial, commercial - shops**

*Building structural engineering focuses on designing and ensuring the stability of a construction's load-bearing components, including beams, columns, and foundations. It plays a crucial role in guaranteeing the structural integrity and safety of buildings, aligning architectural visions with engineering principles.*

## **Design & Execution Landscaping**

**All kind of Landscaping works  
Residencial, commercial - shops**

*Landscaping is the art of transforming outdoor spaces by harmonizing natural elements, plants, and hardscape features to enhance aesthetics and functionality. Skilled landscape design creates inviting environments, fostering a seamless connection between the built environment and nature.*

## **Design & Execution Flooring**

**All kind of flooring works  
Residencial, commercial - shops**

*Flooring plays a vital role in both the aesthetic appeal and functionality of a space.*

**Hardwood - Laminate - Vinyl - Tile - Carpet - Limestone - Concrete - Bamboo - Cork - Linoleum - Granite - Marble - Marbonite - Quartz**

## Design & Execution

# Electrical

Residential, commercial - shops

Electrical work in building construction involves the installation and wiring of electrical systems to ensure a safe and reliable power supply. Electricians strategically place outlets, lighting fixtures, and electrical panels, adhering to building codes and standards to meet the specific needs of the structure and its occupants.

**Renewable Energy and Solar Power:** Our customers also enjoy the benefits of the advisory services that help them understand and gain clarity on aspects of financing, policies, land, fiscal benefits, and regulatory approvals to successfully install solar power plants.

No auxiliary power and no trenching required. Our lights are designed to work 100% off grid reliably for many years.

Solar Lighting International's street lamp systems for parking lots and highways come in many options: 7600 lumens, 14800 lumens, for standard fixtures.

**A Better Panel :**One of the largest costs in the lifetime of a panel is wind damage. We chose a monocrystalline panel that is strongly resistant to high winds and paired that with a pole and mounting structure that is robust enough to handle the remotest regions of planet earth.

Our solar panels deliver up to 50% more power per unit area and have a reduced voltage-temperature coefficient. They also excel in high temperature and low-light conditions, which means they begin producing power sooner and continue producing power longer, guaranteeing a reliable source of energy for your street light.

## Design & Execution

# Plumbing

All kind of interior works  
Residential, commercial - shops

Plumbing work in building construction encompasses the installation and maintenance of water supply, drainage, and sewage systems. Plumbers strategically position pipes, fixtures, and water heating systems, ensuring proper functionality, adherence to building codes, and optimal water efficiency within the structure.

## Design & Execution

# Painting

All kind of interior works  
Residential, commercial - shops

Painting work in building construction involves the application of coatings to surfaces for both aesthetic appeal and protection. Skilled painters meticulously prepare surfaces, apply primers, and choose suitable paints, enhancing the building's appearance while safeguarding it against environmental factors.

## Design & Execution

# Welding works

All kind of interior works  
Residential, commercial - shops

Welding work in building construction is essential for joining metal components, providing structural integrity to frameworks, and ensuring the stability of various elements. Welders use precise techniques to fuse materials like steel, contributing to the strength and durability of the building's framework and infrastructure.

## **Design & Execution** **HVAC**

*Residential, commercial - shops*

HVAC work in building construction involves the installation and maintenance of Heating, Ventilation, and Air Conditioning systems to regulate temperature, humidity, and air quality. HVAC technicians design, install, and service these systems, ensuring optimal comfort and efficiency within the building.

## **Design & Execution** **All kind of contracting works**

*All kind of interior works  
Residential, commercial - shops*

All-encompassing contracting works in building construction involve comprehensive project management, coordinating diverse tasks such as design, construction, electrical, plumbing, and finishing. Contractors oversee the entire process, ensuring seamless execution and delivering a fully functional and aesthetically pleasing structure.

## **Design & Execution** **All kind of Engineering works**

*All kind of interior works  
Residential, commercial - shops*

Comprehensive engineering works in building construction encompass diverse disciplines such as civil, structural, mechanical, and electrical engineering. Engineers collaborate to design and implement robust systems, ensuring the structural integrity, functionality, and efficiency of the building's components.

## GSM

We are specialized in designing, manufacturing various kinds of telecom towers, including angular steel towers, tubular steel towers, monopoles, bionic camouflaged tree towers, cell on wheels( COW), guyed-wire towers and roof-top towers. As an active member of several international tower councils and trade organizations, we stay current on the latest industry trends, technologies, and regulations to deliver compliant, state-of-the-art towers with the most modern capabilities.

## CCTV & Security System

Supply & Installation and Maintenance of CCTV Cameras for both Outdoor & Indoor purpose.

Supply & Installation and Maintenance of Wired & Wireless IP Cameras for both Outdoor & Indoor purpose.

Supply & Installation and Maintenance of Analog PTZ Cameras for both Outdoor & Indoor purpose.

Supply & Installation and Maintenance of Wired & Wireless IP PTZ Cameras for both Outdoor & Indoor purpose.

Supply, Installation and Maintenance of Digital Video Recorder.

Supply & Installation and Maintenance of Network Video Recorder.

Supply & Installation and Maintenance of Wired & Wireless IP Based Door Bell System.

Supply & Installation and Maintenance of Wired & Wireless Door Access Control System

Supply & Installation and Maintenance of Wired & Wireless IP Long Range Reader System.

Supply & Installation and Maintenance of Wired & Wireless Remote IO Module

Supply & Installation and Maintenance of Wired & Wireless Smoke detector sensors/alarm.

## **GPON / EPON, FTTH, Layer 3, Layer 2 & Layer # Products** **Telecom & Networking**

Voice solution ( PBX, IP PBX,) for remote work places where telephone feasibility does not exist, established work places, homes, shopping complex and Govt. places like Airports, Ministry offices, etc.

Data solution (3G-4G Routers) for remote work place, established work place, homes, shopping complex, Govt.places, etc. We also offer triple play services such as Voice, Data and Video.

High end voice solution (Soft Switch with CDR, media gateway) for a complete area. High end equipment used in Telephone exchange can be integrated with the PSTN network for telephone user creation, auto billing of users and assigning various packages to the users (International call baring, call forwarding, call waiting, conference call, caller id display, etc), call routing to PSTN network and mobile operator.

Mobile operator Solution (SIM Servers, GSM Gateways) helps mobile operators to integrate with their existing network and also maintains the management of the SIM users (user creation and maintenance of mobile users).

Passive works like telephone/data cable laying and termination, Fiber cable laying and terminations, routing of patch chords in an office, house, villas, shopping complex, etc.

## **Supply, Installation, Splicing, & Testing of Fiber Optic cables and Accessories**

Duct Loose Tube Optical Cables  
Direct Buried Loose Tube Optical Cables  
Aerial Loose Tube Optical Cables  
Cable TV Optical Cables  
Underwater Optical Cables  
Multi Core Loose Tube Optical Cables  
Ribbon Slot Optical Cables  
Cord Type Optical Cables  
Carpet Application Optical Cables  
Emergency Recovery Optical Cables  
Single Mode Optical Cables  
Multi Mode Optical Cables  
Dispersion Shifted Optical Cables  
Non-zero Dispersion Shifted Optical Cables  
Any Wave Single Mode Optical Cables

Optical Distribution Panels  
Optical Patch Panels  
Optical patch Cord  
Optical Adapters  
Optical Attenuate  
Mechanical Optical Connectors  
Optical Fiber Protection Sleeve  
Optical Jumper Cables  
Optical Junction Box  
Optical Closure Box
